Project Details:

Delivery Hub ID:	3264	Project Name:	Derivatives Non-Deliverable Forwards NDF	Project Budget:	
Entity:	BSI	Business Function Portfolio:	BSI_Treasury and Markets	Project Type:	B3P
Cloud:	No				

Projects with budget>$2M are expected to self-fund any required deliverables

Project Description: Expanding the product catalogue by offering the NDF product to the clients allowing them to have better ability to mitigate their investment portfolios risks by hedging and to optimize the returns in their investments.

Project Manager:	Megia Planet, Domingo	IT Lead:	Jose Luis Martinez Avial	Data Steward:	Miguel Menendez -- BSI
Executive Sponsor:	Ted Fernandez	CIO:	Jose Oliveros	Business Sponsor:	Ted Fernandez

Assessment:

1) Is this a system development project that will impact data (create, move, update/transform, or delete data? (i.e. New systems/applications creating new data or that will house existing data, existing data moved to a new database/table/column,etc.)

○ No ◉ Yes

1a) Does the scope include producing, consuming, or remediating any new or existing data?

○ No ◉ Yes

1b) Does the project involve implementation of new systems/applications, business process changes or ETL changes that will impact the current flow or introduce new flow of data?

○ No ◉ Yes

1c) Are there any applications/tools/platforms to produce/consume data in scope?

○ No ◉ Yes

What is the nature of the data elements involved in the project? (select all that apply)

- ☑ Existing KDE
- ☑ Non an existing KDE but should be considered as the data will be used in regulatory/senior management reporting, critical business processes, models
- ☐ Not an existing KDE and not considered critical by the business

Does the project involve activities that are aimed at or will require remediation of known data defects/issues?

◉ No ○ Yes, this will impact a known data defect or related to a Top Data Issue

Please specify the data flow impacts

◉ The impact on the flow of data is on existing lineage (either functional or technical if available)
○ The impact on the flow of data is not currently captured by lineage (functional or technical if available)

Please list all impacted applications, tools, databases, and platforms (ex. Tableau/PowerBI, SAS Grid, Snowflake, Data Lake)

T24, Bloomgerg, Medea, 360, Murex 3 Latam, Data Lake, MARS CREAM, Appian.

Will the project utilize the USA/EDW as part of the solution? (only applicable to SHUSA/SBNA/SanCap)

○ Yes

DRA Rating:

HIGH

CDO: Approved
