Release

Number:	RLSE1271544	Type:	Normal
Product:	PDCT0084822	State:	Closed
Application:	Appian BSI - Security Lending Workflow	Priority:	2 - High
		Risk:	Minimal
Opened by:	Laura Benavides Ochoa	Impact:	3 - Low
Requested By:	Laura Benavides Ochoa	Impact Categorization:	N3 - POTENTIAL LOW IMPACT CHANGE- STANDARD
Requested Group:	PBM_IT_Change_Coordinators		
Company:	SPB Miami	Data Regulation Impact:	false
Category:	Deployment	Emergency Tipology:	
Reason:	New Application	Platform:	
Incident:		Namespace:	
Problem:		Assignment group:	PBM_IN_IM_Change_Manager
Vulnerable Items:		Assigned to:	
Request:		Release Parent:	
Project number:		Copied From:	
Project number Project Name:		Change:	CHG002674318
Application Version:		Template Set:	
Requesting Organisational Unit:			

Short description:

Deploy to production include New Appian application to setup client security lending option

Description:

[ID:3263] This project aims to create a new revenue stream for BSI Miami with the introduction of the Security Lending business. This new service will allow BSI to lend its clients' securities held on custody at JP Morgan, in accordance with the current regulation, to pre-approved borrowers, supporting BSI to manage its liquidity needs and enhancing its returns.

Planning

Justification:

Securities lending involves the temporary transfer of securities from a lender to a borrower, with the agreement to return the securities at a later, typically unspecified, date. During the duration of the loan, the legal title of the loaned securities transfers to the borrower. Securities lending facilitates activities such as short selling, executing arbitrage strategies or to influence shareholder votes (proxy contests).

Under the proposed securities lending program, BSI will borrow, as principal, fixed-income or equity securities held by its clients (whether fully paid or encumbered) and then, as principal, BSI will lend those same securities to pre-approved borrowers in exchange for a lending fee, a portion of which will be shared with clients.

Implementation plan:

• Make a copy of current packages for:
- BPI Groups
- BPI Docusign

• Deploy new packages for:
- SLW Data Model
- SLW Security Lending Workflow
- BPI Groups
- BPI Docusign

• Rollback:
Restore old packages for:
- BPI Groups
- BPI Docusign

Risk and impact analysis:
Low. No outage. Low complexity. No critical service affected.
Backout plan:
Delete DB tables and remove new apps - rollback scripts will be providedUAT by final users - document attached
Test plan:
DEV test - unit test and UAT by final users - UAT plan attached
